

SIDE-DIGGERS VL 110 - VL 900 - VL200

VL 110

NARROW SIDE DIGGER

The VL110 was developed specifically for orchard or vineyard tractors.
Due to the parallelogram frame the VL110 fits completely within the dimensions of the tractor in its "in" position.

Specifications :

Hydraulic side shift and depth control.
Blade : 40 to 45 cm.
Lifting depth : up to 35 cm.
Possibility to start lifting in the middle of a row.
Tractor : + 55 Hp.

Ideal solution for lifting fruit trees.

VL 900

SHAKING BLADE DIGGER

The VL900 has a smooth operation thanks to the shaker which is operating in the opposite direction of the blade.

Specifications :

Adjustable wheels.
Blade in high resistance steel : width up to 50 cm.
Separate excenters for the blade and the shaker.
Lifting depth : up to 40 cm.
Tractor : + 60 Hp.

Options :

Hydraulic adjustable wheels.
Hydraulic adjustable headstock.

Versions for standard and narrow tractors.

VL 200

PRODUCTION MACHINE

The VL200 is known as the most reliable machine on the market.
An over-sized frame and over-sized components make the VL200 nearly indestructible.
Simple but efficient mechanism with only 3 moving parts.

Specifications:

Hydraulic adjustable headstock and wheel.
Side shift on chrome shaft of 60 mm
Fixed blade : 50 up to 75 cm.
Lifting depth : 50 cm in standard version.
Tines : length 90 cm
Tractor : + 90 Hp

The VL200, your solution for uncomplicated tree lifting.
